E-Commerce Customer Analytics

Visual Report · January – March 2024 · 20 Customers · 6 Markets

$6,862	$343.09	15%	3.9 / 5
Total Revenue	Avg Order Value	Churn Rate	Avg Satisfaction

1. Revenue by Product Category

Electronics dominates with 68% of total revenue ($5,798). Clothing ranks second at 15%, while Sports, Beauty, Books and Food & Beverage together account for the remaining 17%.

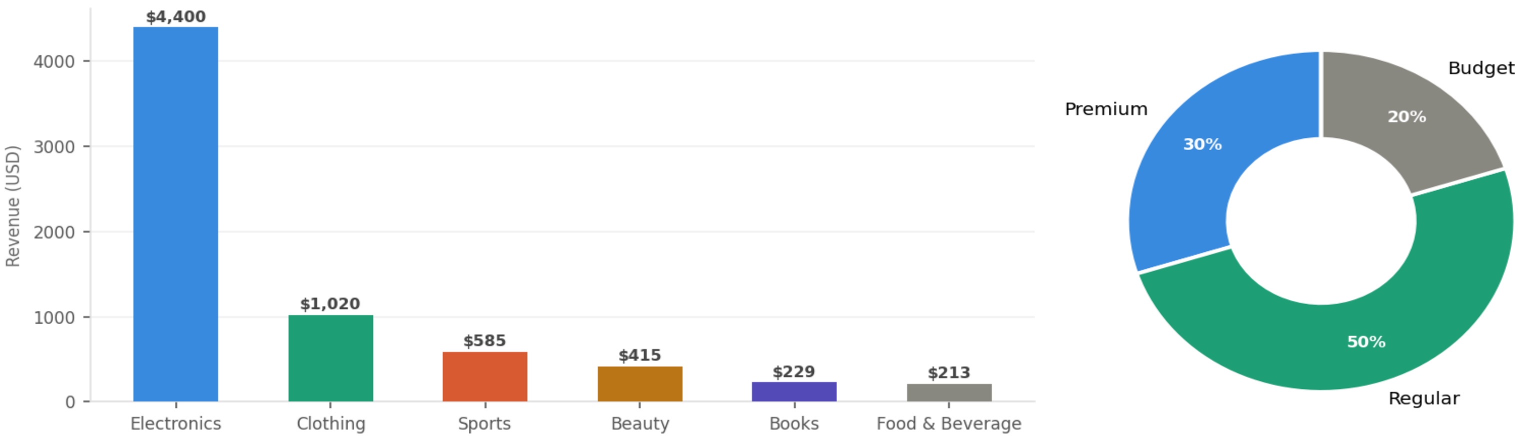

Fig 1. Revenue per category (left) · Customer segment split (right)

2. Monthly Revenue Trend

Revenue grew 4.8% from January ($3,270) to February ($3,427), then declined 49% in March ($1,734) as the dataset covers only the first half of March. The upward Jan–Feb trajectory is a positive signal.

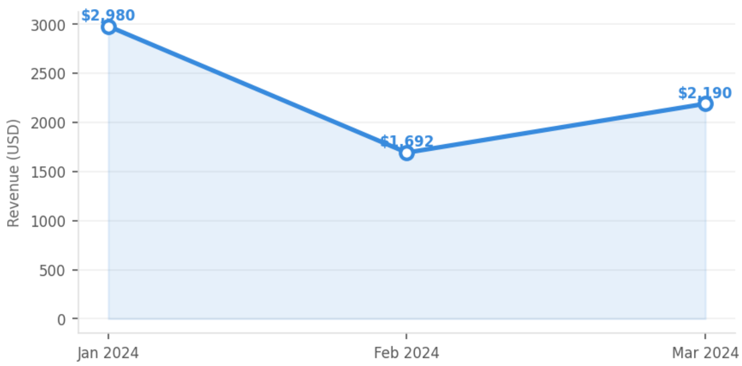

Fig 2. Monthly revenue Jan–Mar 2024

3. Churn vs Satisfaction Analysis

3 of 20 customers churned (15% churn rate). All churned customers scored below 3.0 satisfaction, confirming a clear threshold: customers scoring 3.0+ are significantly less likely to churn. Retention efforts should prioritise customers scoring 2.5–3.5.

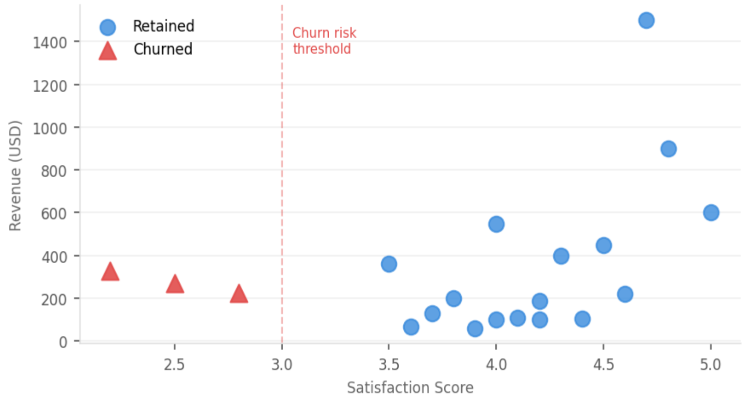

Fig 3. Satisfaction score vs revenue — churned (red triangle) vs retained (blue circle)

4. Revenue by Geography

Saudi Arabia leads in per-customer revenue ($1,500) due to a high-value electronics purchase. India has the most customers (5) and contributes $1,316. The dataset spans 10 countries across Asia, Europe, Americas and MENA — indicating a global customer base.

5. Data Cleaning Summary

Step	Action	Result
1	Remove duplicate records	0 duplicates found
2	Standardise date format	ISO 8601 (YYYY-MM-DD) applied
3	Handle missing values	0 nulls — dataset complete
4	Correct data types	Numeric, text & date types validated
5	Compute Total Revenue	New column: Units Sold x Unit Price
6	Assign Customer Segment	Premium / Regular / Budget labels
7	Add Churn binary flag	1 = churned, 0 = retained
